SUMMARY

Final-year CS student at Manipal University Jaipur shipping production-grade AI systems and full-stack applications. Built agentic RAG pipelines (LangGraph, FAISS, LangChain), LLM-orchestrated multi-agent workflows, and deployed full-stack platforms serving real users — in Python, TypeScript, and Node.js. AWS certified. Comfortable owning systems end-to-end from retrieval architecture to CI/CD deployment.

EDUCATION

Manipal University Jaipur

Jaipur, India

Bachelor of Technology in Computer Science — CGPA: 8.46/10 (Top 15%)

Aug 2023 – May 2027

- **Relevant Coursework:** Data Structures & Algorithms, Software Engineering, Database Systems, Operating Systems
- **Achievements:** Dean's List (2023–2024); NPTEL Data Structures & Algorithms – Top 5% nationwide (Score: 87%)

EXPERIENCE

Site Guru Pvt. Ltd.

Remote

Full Stack Developer Intern

Jun 2026 – Present

- Building full-stack web applications using JavaScript, Node.js, Vue 2, and MongoDB in a performance-driven remote environment.
- Developing and consuming RESTful APIs, implementing authentication flows, and shipping frontend interfaces to production across live client projects.
- Participating in daily code reviews and maintaining consistent productive coding output across an Agile development workflow.

Partners Choice Beverages Pvt. Ltd.

Jaipur, India

Software Developer Intern

May 2025 – Jun 2025

- Built Python and JavaScript automation scripts that eliminated manual reporting bottlenecks, reducing weekly report turnaround time by 60%.
- Designed and standardized data output pipelines; authored technical documentation that reduced contributor onboarding time.
- Shipped features across 4-week Agile sprint cycles with zero production regressions; managed Git branching and code reviews in a collaborative codebase.

PROJECTS

DevLinkUp | *React, Node.js, Express, MongoDB, REST APIs* | [Live](#) · [GitHub](#)

- Built and deployed a full-stack developer showcase platform with 150+ registered users, zero-downtime CI/CD pipelines, and paginated RESTful APIs consumed by a React frontend.
- Designed a MongoDB schema optimized for read-heavy profile queries; reduced codebase duplication by 40% through systematic refactoring and modularization.

MedDoc-Flow | *Python, LangChain, FAISS, Semantic Search* | [GitHub](#)

- Developed an AI-powered medical document assistant using FAISS vector indexing and LangChain, achieving sub-second semantic retrieval across multi-document corpora.
- Designed modular document parsing pipelines handling heterogeneous file types, abstracting ingestion complexity from the query layer.

TECHNICAL SKILLS

AI & ML: LangChain, LangGraph, FAISS, RAG Pipelines, Prompt Engineering, Agentic Workflows, Vector Search

Languages: Python, TypeScript, JavaScript (ES6+), SQL, HTML/CSS

Backend & Frameworks: Node.js, Express.js, FastAPI, REST APIs, WebSockets

Frontend: React, Next.js, Streamlit

Databases: MongoDB, PostgreSQL, MySQL, Redis

Cloud & DevOps: AWS (S3, EC2, Lambda), Docker, CI/CD Pipelines, Git/GitHub, Vercel

CERTIFICATIONS & ACHIEVEMENTS

AWS Academy Graduate – Cloud Architecting (60 hours, Apr. 2026)

AWS Academy Graduate – Cloud Security Foundations (20 hours, Mar. 2026)

NPTEL – Data Structures & Algorithms (Top 5% nationwide, Score: 87%)

Dean's List – Consistent Top 15% of cohort (2023–2024)
